Forecast for Sunday 06 Sep 2020

Weather: Occasional showers during the early hours of Sunday may become more frequent and locally heavy around dawn, with a low risk of thunder. These heavier showers will quickly ease leaving sunny spells and isolated mainly light rain showers through the rest of the morning and afternoon. Becoming dry with clearing skies for the evening.

Chance of cloud free mountain/hill tops above 800m: 70% during the early hours with patchy cloud near 700m, but falling to 20% towards around dawn as more extensive cloud develops near 500m. Improving to 70% around midday as cloud lifts and breaks to leave only patches near 800m and becoming 100% by evening.

Visibility: Generally very good with clear views of distant hills, but deteriorating to locally moderate in any heavier showers, and very poor at times on the highest routes when any cloud covers the summits.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

The sunshine will still be strong in between the showers and sun protection is advised.

Forecast for Monday 07 Sep 2020

Weather: Dry but increasingly cloudy during the early hours of Monday, with outbreaks of patchy light rain developing around dawn. The rain will continue on and off through the rest of the day, and will be most persistent across western areas of Snowdonia, whilst there may be occasional drier interludes in sheltered parts of the east.

Maximum wind: West to southwesterly 25-30mph gust 35-40mph.

Chance of cloud free mountain/hill tops above 800m: 100% at first then falling to 60% towards dawn as patchy cloud develops near 600m, then deteriorating to 20% or less mid-morning onwards as extensive cloud forms nearer 500m, with patches as low as 400m on exposed west facing slopes throughout the afternoon and evening.

Visibility: Very good at first, but becoming generally moderate by mid-morning and locally poor in rain with views of even nearby hills barely visible and occasionally obscured. Very poor on the higher routes for much of the day as cloud lowers to cover the summits.

Temperature: **Valleys:** Plus 9 Celsius becoming Plus 15 Celsius.
At 800m: Plus 8 Celsius becoming Plus 12 Celsius.
Freezing level: Above the summits.
